- Dual cab mounted exhaust
- 4 back up lights on side extenders
- Bostrom high back Talladega drivers seat with arm rests

**Real truck options...  
...selected by real Lease Operators**

To make sure that we negotiated the options that are important to both Lease Operators and their business success, we asked a wide variety of our drivers for the options that they felt were important, but would not result in unacceptable levels of added weight or substantially increased cost. The above features were based on their recommendations to ensure that you get a full featured tractor.

**Run the business you always have...  
...or run the business you've always wanted**

**Additional business capital**

Running a business takes capital. New opportunities and challenges require the ability to react to market conditions. With the \$15,700 saved on your down payment, you have greater cash available to deal with the unknowns and maximize the success of your business.

**The lowest possible financing rates**

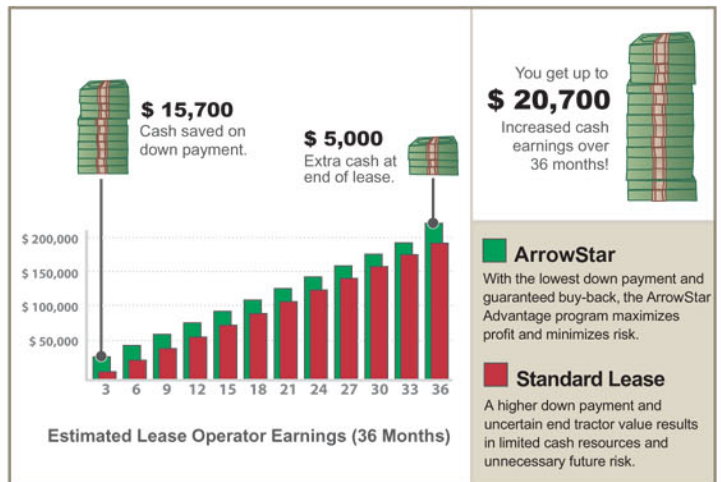

We have been able to leverage our size and reputation to negotiate the best financing rates available in our industry. These low rates ensure the lowest possible monthly payment on your tractor.

**Guaranteed buy-back**

Why risk losing money at the end of your term, or worry about the down payment on your next new truck? With a guaranteed buy-back, the majority of your down payment on your next new truck will be waiting for you at the end your lease.

**Maintenance administration**

As a business person, unexpected maintenance costs can devastate your business. Our comprehensive maintenance management system provides you with fixed monthly maintenance costs, allows you to build an account to protect against unexpected breakdowns, and allows you to collect a significant end of lease payout through taking good care of your tractor.

*"The ArrowStar program is first-rate. For very little money, I was able to get a truck with all the options that make a driver feel great. I'd recommend this program to any owner operator."*

Arrow Transportation Systems and Gold Star Transport are pleased to offer you this brochure as a first step in exploring the benefits that are available to you through the ArrowStar Advantage Program. This brochure provides a general overview of the program and some of the superior features of the trucks we are offering.

A group of our most successful Lease Operators assisted us in developing the details of this program to ensure we would provide the most comprehensive package available. Our goal is simple, by providing a program that helps you make more money and reduces your risk, you will remain a member of our team over the long term.

We hope you will take this opportunity to become an ArrowStar Operator. To find out more about the program, talk to your division manager, or call at the number listed inside the brochure.

### ***It's the right choice, and we can prove it***

At Arrow, we know that your success is dependent on many factors. Unlike competitor programs that offer singular benefits to attract quick sales, we created this comprehensive program to help ensure your continued business success. How do we stack up? You be the judge.

| Plan Comparison Chart  |               |                 |
|--|---------------|-----------------|
